LAV Label is on track to be the next Amazon and guess what? LAV shares profits with their members forever (unlike Amazon). Did you know that Amazon earned $2.54 Billion dollars in the first quarter of 2020? If amazon distributed profits they could have sent 100,000 people checks in April 2020. Using LAV's model, Amazon could have enhanced the lives of 100,000 people during this pandemic... BUT.....Amazon doesn't share their profits – they keep it all to themselves. That does not help every day people. LAV's values are much different and that is what intrigued me about this company. They strongly believe in the power of sharing.
